

PRODUCT OVERVIEW

Product Type:

- ✓ Single-component special modified epoxy resin primer.

Benefits:

- ✓ Be compatible with a variety of metal materials and topcoat paint.
 - ✓ Offer excellent corrosion resistance by achieving adhesion that cannot be obtained with topcoat painting alone.
-

Usages:

Housing components, steel components, instruments, civil construction machinery, industrial machinery, various electrical components, and more...

Main features:

Dry by baking or in an air-dried state, quick-drying, and touch-dry capability.
Have excellent corrosion resistance and a beautiful coating appearance.
Not intentionally include harmful heavy metal-based pigments such as lead and chromium.

Coating Specification:

Pre-treatment: Cleaning, degreasing, phosphating, etc.
Painting method: Air spray, electrostatic spray.
Curing Condition: Tack free: within 10 minutes; Semi-cured: 30 minutes; Cured: 2 hours.

Product Specification:

Paint form: Single- component.
Mixing Ratio
Color: White, Light grey, Black
Thinner for dilution
