

PRODUCT OVERVIEW

Product type:

- ✓ Thermosetting Fluororesin Metallic Paint.

Benefits:

- ✓ Simplifies the traditional 4-coat, 4-bake process for metallic clear coatings.
 - ✓ Offers weather resistance and adjustable gloss values, ensuring long-lasting aesthetics.
 - ✓ Possesses various performance attributes such as adhesion, boil water resistance, acid resistance, alkali resistance, moisture resistance, water resistance, and resistance to neutral salt spray.
-

Usage:

Suitable for painting building curtain walls, various sidings, interior panels, and more.

Main features:

Provides paint film performance be similar to traditional fluororesin finishes for metallic specifications.

Exhibits high adhesion and weather resistance.

Allows for adjustable gloss values (adjust to 30%).

Coating specification:

Pre-treatment: Chromate treatment (Zinc phosphate+ Chromate treatment).

Painting method: Spray / Electrostatic spray.

Curing Condition: 170°C × 20 minutes

Possible to apply 2 coats with 1 bake.

Product specification:

Paint form: Single-component / Solvent-based

Color: Custom colors available

Available from glossy to semi-gloss.

Thinner: Dedicated thinner for Fluororesin.
