

PRODUCT OVERVIEW

Product type:

- ✓ Room-temperature curing metallic fluoropolymer coating.

Benefits:

- ✓ Simplifies the traditional 4-coat 4-bake metallic clear coating process.
 - ✓ Offers adjustable gloss, excellent weather resistance, and aesthetic maintenance.
 - ✓ Features strong adhesion, resistance to boiling water, acids, alkalis, humidity, water, and neutral salt spray.
 - ✓ Two-component paint enables onsite painting.
-

Usage:

Suitable for paint building curtain walls, various sidings, and interior panels.

Main features:

Similar film performance to traditional metallic fluoropolymer finishes.

High adhesion and weather resistance.

Adjustable gloss level (up to semi-gloss).

Coating specification:

Pre-treatment: Factory painting: Chemical treatment (Zinc phosphate/Chromate processing)

Onsite painting: Appropriate surface preparation + primer coating.

Painting method: Factory: Spray/Electrostatic spray

Onsite: brush/roller/spray.

Curing Condition: Promote drying: 80°C x 40 min / 130°C x 20 min

Also suitable for room temperature drying.

Product specification:

Paint form: Two-component / Solvent-based.

Mixing ratio: 8:1

Color: Custom colors available

Available from glossy to semi-gloss.

Thinner: Dedicated thinner for Fluororesin
