

PRODUCT OVERVIEW

Product type:

- ✓ High Penetration Epoxy Resin Coating with Rust Prevention Feature.

Benefits:

- ✓ Offers high penetration into rust layers to fundamentally suppress corrosion.
 - ✓ Applicable to a wide range of metals, enables rapid construction even at low temperatures.
 - ✓ Eco-friendly, light solvent-based paint without heavy metals like lead or chromium.
 - ✓ Ideal for repainting over old coatings.
-

Usage:

Corrosion control in chemical plants, protection of metal surfaces prone to rust. Meets the demand for quick construction in hard-to-reach areas where complete rust removal is challenging.

Main features:

Suppresses rust progression by blocking corrosion factors through strong penetration into rust layers.

Versatility in painting a wide range of metals, including galvanized, stainless steel, and aluminum.

Capable of drying and allowing for next-day painting even at low temperatures around 5°C.

Coating specification:

Painting method: Appropriate surface preparation.

Painting method: Brush, Roller.

Curing Condition: Cures at low temperatures from 5°C to room temperature.

Product specification:

Paint form: Two-component.

Light Solvent-based.

Mixing ratio: 9:1

Color: Grey

Thinner: Paint thinner
