

PRODUCT OVERVIEW

Product type:

- ✓ Substitute for Coal Tar - Environmentally Friendly, High Durability, Tar-Free Coating.

Benefits:

- ✓ Free from coal tar, minimizing environmental impact, and offers superior chemical resistance, oil resistance, and seawater resistance.
- ✓ High solids content prevents sagging, allowing for a thick coating in a single application.
- ✓ It boasts enhanced resistance to water temperature variations, outperforming traditional products in performance.
- ✓ It also has strong adhesion to steel plates and shop primers.

Usage:

Ideal for use in locations requiring durability and environmental performance, such as bridges, water treatment facilities, chemical plants, and port facilities.

Main features:

High functionality with excellent chemical, oil, and seawater resistance.

High solids for thick application without dripping or bleeding.

Superior solubilization technology with epoxy resin and special modified resin.

Coating specification:

Pre-treatment: Appropriate surface preparation.

Painting method: Airless spraying.

Curing Condition: Normal temperature drying.

Product specification:

Paint form: Two-component.

Mixing ratio: Standard ratio.

Color: Standard colors: Black, Brown.

Custom colors available.

Thinner: Dedicated thinner for Epoxy Resin.
