

PRODUCT OVERVIEW

Product type:

- ✓ Polyester powder coating for construction aluminum materials.

Benefits:

- ✓ Excellent weather resistance, ideal for outdoor use.
- ✓ Also features superior yellowing resistance during curing, achieving a high-quality, smooth, and vivid coating.
- ✓ Gloss retention rate exceeds 80% in accelerated weathering tests.

Usage:

Used for exterior applications in metal building materials such as exterior panels, aluminum materials, metal fittings, and ceiling materials.

Main features:

Gloss retention rate over 80% after 1200 hours in accelerated weathering tests (for white shades).

Standard film thickness of 60-80µm ensures no concerns about sagging or pinholes.

Compatible with tribo guns (friction charged guns).

Coating specification:

Pre-treatment: Chromate treatment.

Painting method: Electrostatic spray method.

Curing Condition: 180°C for 20 minutes.

Product specification:

Paint form: Powder.

Color: Customizable (gloss levels from full gloss to semi-matte are available).
