

PRODUCT OVERVIEW

Product type:

- ✓ Quick-drying urethane-modified alkyd resin paint.

Benefits:

- ✓ By utilizing urethane alkyd resin, we are able to keep prices down while maintaining high quality and excellent cost performance.
- ✓ Quick-drying properties shorten working time, allowing for efficient painting.
- ✓ With high water and moisture resistance, the coating film can be maintained over an extended period even in harsh environments.

Usage:

Ideal for applications requiring durability such as construction machinery, vehicles, steel containers, chassis, and steel structures.

Main features:

Improved work efficiency with quick-drying capability.
High water resistance and moisture resistance for long-term protection.
Cost reduction with urethane alkyd resin.

Coating specification:

Pre-treatment: Appropriate substrate preparation.
Painting method: Brush, airless spray, air spray.
Curing Condition: Normal temperature drying

Product specification:

Paint form: One-component, solvent-based.
Color: Custom colors available
Thinner: Dedicated thinner for Urethane-modified Alkyd Resin.
