

## PRODUCT OVERVIEW

**Product type:**

- ✓ Two-component acrylic urethane resin coating

**Benefits:**

- ✓ Offers excellent water, chemical, and solvent resistance, providing long-term durability and protection.
  - ✓ Enhances appearance with good gloss and film build.
- 

**Usage:**

Used to enhance the durability and appearance of industrial and chemical equipment.

**Main features:**

Good gloss and film build.  
Excellent hardness and flexibility.  
Strong water and alkali resistance.

**Coating specification:**

Pre-treatment: Degreasing and cleaning.  
Painting method: Air Spray.  
Curing Condition: 120°C for 30 minutes.

**Product specification:**

Paint form: Two-component.  
Mixing ratio: Base 4: Hardener 1  
Color: Custom colors available.  
Thinner: Dedicated thinner for acrylic urethane resin.
