

PRODUCT OVERVIEW

Product type:

- ✓ Acrylic resin, leather-like pattern, water and chemical resistant two-component paint.

Benefits:

- ✓ This two-component paint mainly consists of acrylic resin and non-yellowing polyisocyanate, combining high hardness and elasticity.
 - ✓ It excels in water resistance, chemical resistance, and solvent resistance, maintaining performance for long periods in harsh environments.
 - ✓ Additionally, it has high heat and weather resistance, making it suitable for a wide range of applications.
-

Usage:

Ideal for painting medical, industrial, and scientific equipment.

Main features:

High hardness and flexibility.
Excellent water and alkali resistance.
Excellent heat and weather resistance.

Coating specification:

Pre-treatment: Degreasing and cleaning of the material are essential.
A dedicated intermediate is necessary to achieve an effective pattern.
Painting method: Air Spray.
Curing Condition: 120°C for 30 minutes.

Product specification:

Paint form: Two-component.
Mixing ratio: 8:1
Color: Custom colors available.
Thinner: Dedicated thinner for acrylic resins.
