

PRODUCT OVERVIEW

Powder Kitchen PKV24

Product type:

MS Powder Kitchen PKV24

- The most important element for economical multi-color powder coating is the powder kitchen, which enables automatic powder supply from a monitored powder container.
- A powder pump that is easy to clean transfers the powder to the powder supply unit. The ultrasonic sieving system ensures clean, impurity-free powder supply.
- Automatic cleaning (of the powder container, powder injector, hose, and spray gun) enables rapid color changes.
- An integrated exhaust fan keeps the work area clean and prevents powder leakage. You can easily choose between recovering and reusing powder or disposing of it via the touchscreen interface.

Powder suction system supports up to 24 guns

Retrofit-type powder kitchen

High-speed color change system integrated with PLC-controlled powder kitchen

Fresh powder feeding section

MS Ultrasonic Sieving System US-60

Touchscreen with monitoring functions

Features of the MS Powder Kitchen PKV24

Powder supply from general commercially available powder containers with capacity ranging from 20 to 100 kg

Touchscreen PLC (Process Control System) control panel

Automatic cleaning function for injectors, hoses, and spray guns

Optimized powder circulation enables coating with minimal powder usage

Upgradeable from existing systems

Cost-effective for both large and small-scale automatic coating production cycles

Equipped with an ultrasonic sieving system

Equipped with a built-in vacuum cleaning system

The standalone powder kitchen (1200 × 1200 mm) can be installed flexibly regardless of location
