

PRODUCT OVERVIEW

Product type:

- ✓ One-component modified epoxy resin paint – weak solvent type.

Benefits:

- ✓ Safe, environmentally friendly primer.
 - ✓ High adhesion and superior corrosion resistance.
 - ✓ Easy to construct.
 - ✓ Dries quickly.
-

Usage:

Used as a primer for metal surfaces.
Anti-rust paint for steel and steel structures.

Main Features:

Because it dries quickly, it can be painted the next day even in winter (5°C). If the temperature is above 20°C, two processes (chlorinated rubber, weak solvent paint) can be carried out in one day.

Strong solvent based topcoats can be used. All painting jobs, from thinning to cleaning, can be done with paint thinner and are very gentle on old paint.

Environmentally friendly paint, lead free, chromium free.

Instructions:

Pre-treatment: Degreasing, surface cleaning according to ISO-St2 (SSPC-SP2) standard equivalent.

Painting method: Painting by brush/roller, Airless paint spraying.

Drying time: 20°C finger touch x 30 minutes, semi-hardened x 1 hour.

Product Information:

Paint type: One component, weak solvent

Color: White, rust red, gray, pale colors.

Epoxy paint solvent (5-10%).
